DETAILED ACTION

Drawings

1. New corrected drawings in compliance with 37 CFR 1.121(d) are required in this application because only a proposed drawing correction was submitted. The proposed drawing corrections are approved.

Applicant is advised to employ the services of a competent patent draftsperson outside the Office, as the U.S. Patent and Trademark Office no longer prepares new drawings. The corrected drawings are required in reply to the Office action to avoid abandonment of the application. The requirement for corrected drawings will not be held in abeyance.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.
- 3. Claims 1 and 8 are are rejected under 35 U.S.C. 102(e) as being anticipated by Groenke et al. (6,125,299).

Regarding claim 1, Groenke shows at least one first high-voltage defibrillation electrode (150A); at least one second high-voltage defibrillation electrode (150B) (Figs. 6-7); at least one manually operable control (200) mechanically connected with and in the vicinity of at least one of the first and second electrodes; and a resuscitation control unit (22) mechanically separate from the at least one manually operated control (200) electrically connected to the at least one

manually operable control (200) and configured to provide resuscitation prompts to a rescuer based on use of the manually operable control by a rescuer (Col. 8, line 50-Col. 9, line 34).

Regarding claim 8, Groenke further shows a sternum electrode and an apex electrode (Figs. 6-7).

Response to Arguments

4. Applicant's arguments with respect to claims 1 and 8 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
